Re: RCRA Hazardous Waste Generator Delisting Request
RCRA Permit No. PRD9800594709
Municipality of Ponce and BFI of Ponce, Inc.

It has come to our attention that the Ponce Landfill facility is listed in your records as a large quantity generator (LQG) of hazardous waste and a RCRA regulated transporter and treatment, storage and disposal (TSD) facility. Per your instructions to our consultant, Mr. Lincoln Romain, we are making this written request to be de-listed from this status. The Ponce Landfill is located in Ponce, Puerto Rico. It is an active municipal solid waste (MSW) landfill. In addition to the MSW, the landfill also accepts asbestos, treated bio-medical wastes, industrial wastes, other non-hazardous special wastes, and liquid waste for solidification. The landfill is regulated under Puerto Rico's Subtitle D program and is in compliance with all the demonstration requirements including prohibitions against generating, transporting, treating, storing, and disposing of hazardous waste. The facility has operated as a solid waste landfill since 1977 and has very detailed waste screening procedures to prevent the acceptance of hazardous waste.

Since we are already complying with all aspects of the non-hazardous Subtitle D regulations, we are eager to eliminate the error in our EPA generator activity listing. If you have any questions or require additional information, please contact Mr. Romain at 973-537-6522 or myself at 787-788-7171.

Sincerely,

BFI of Ponce, Inc.

Alexander B. Class, C.O.H.C.
